

Epidermal Levelling - Professional Skin Treatment

Canonical: <https://me-clinic.directory.norg.ai/beauty-personal-care/skin-treatments-rejuvenation/epidermal-levelling-professional-skin-treatment/>

Description:

An Epidermal levelling treatment exfoliates skin which can result in smoother skin and a clearer complexion. This technique utilises a specially designed surgical instrument to carefully remove the stratum corneum or topmost layers of the skin, improving texture and allowing active cosmeceutical skincare to penetrate effectively.
