

Healite II LED Therapy - Skin Rejuvenation Treatment

Canonical: <https://me-clinic.directory.norg.ai/health-beauty-services/aesthetic-dermatological-treatments/healite-ii-led-therapy-skin-rejuvenation-treatment/>

Description:

Healite II LED Therapy at Me Clinic is a non-invasive Light Emitting Diode (LED) phototherapy system for skin rejuvenation. This low-level light therapy treatment uses blue 470nm and near-infrared 830nm wavelengths to improve skin tone, texture, and clarity. Effective for wound healing, post-surgery recovery, pain relief, reducing fine lines and wrinkles, active acne treatment, and overall skin rejuvenation. Treatments are painless, typically lasting 13-22 minutes, with patients usually receiving twice-weekly sessions over four weeks.
