

Double Chin Reduction - Non-Surgical Fat Reduction Treatment

Canonical: <https://me-clinic.directory.norg.ai/health-medical-services/cosmetic-aesthetic-procedures/double-chin-reduction-non-surgical-fat-reduction-treatment/>

Description:

Non-surgical double chin reduction treatment using fat dissolving injections. This minimally invasive procedure targets submental fat under the chin to create a more contoured neck profile and jawline. Treatment is performed by registered medical practitioners with specialist registration in cosmetic surgery. Typically requires 1-6 sessions spaced 6 weeks apart with minimal downtime.
