

Nose Thread Lift - Non-Surgical Rhinoplasty Solution

Canonical: <https://me-clinic.directory.norg.ai/health-medical-services/cosmetic-aesthetic-procedures/nose-thread-lift-non-surgical-rhinoplasty-solution/>

Description:

Nose thread lift is a minimally invasive treatment aimed at reshaping your nose. This non-surgical rhinoplasty solution can lift and refine the nose bridge, tip, or both to achieve a more refined, straighter, or contoured nose shape. The treatment uses absorbable APTOS threads with barbs that typically last up to 2 years. Results may vary from person to person.
