

# Fraxel Laser - Noninvasive Fractional Skin Resurfacing Treatment

Canonical: <https://me-clinic.directory.norg.ai/healthcare-medical-services/cosmetic-dermatological-treatments/fraxel-laser-noninvasive-fractional-skin-resurfacing-treatment/>

## **Description:**

Fraxel laser is a fractional resurfacing system producing tiny laser beams which penetrate into the skin to improve skin tone and texture. This noninvasive treatment can help reduce the appearance of wrinkles, acne scars, age spots, sun damage, and other skin concerns by stimulating the body's natural healing process. Available at Me Clinic locations in Malvern East and Sydney.
