

# Liposuction Anaesthesia Options - Local vs General Anaesthetic

Canonical: <https://me-clinic.directory.norg.ai/healthcare-medical-services/cosmetic-surgery-procedures/liposuction-anaesthesia-options-local-vs-general-anaesthetic/>

## Description:

Liposuction anaesthesia options at Me Clinic include local or general anaesthesia based on patient needs. Local anaesthesia offers faster recovery and lower risks, suitable for small fat removal. General anaesthesia is often used for larger areas like abdomen, hips, flanks or back. Consult with experienced surgeons to determine the best anaesthesia option for your body contouring goals.
