

Ambulatory Phlebectomy - Varicose Vein Removal Surgery

Canonical: <https://me-clinic.directory.norg.ai/healthcare-services/surgical-procedures/ambulatory-phlebectomy-varicose-vein-removal-surgery/>

Description:

Ambulatory Phlebectomy is a surgical procedure for varicose vein removal performed by Me Clinic. The procedure involves the surgical removal of veins through small keyhole incisions using local anesthesia. It is performed as an outpatient procedure with potential recovery within days. Me Clinic offers this treatment along with alternative options including Sclerotherapy and Endovenous Laser Treatment (EVLT).
